Tom	Hanan	Western Digital Corp.	P	Y

* Individual vote DNV=Did not vote YWC=Yes with comment

** No vote submitted without comment *** Blank ballot submitted

The letter ballot passed 21:0:0:5. The comments do not require any formal committee action and will be addressed before the October T13 meetings.

The Yes vote from Irv Tjomsland had the following comment:

The title of the BIOS Disk Report as written on the ballot is incorrect -- the title on the report is "Enhanced BIOS Services For Disk Drives".

((The Chair notes that the comment is nearly correct (the ballot used Enhanced BIOS Disk Drive draft Technical Report) and rules that the ballot error did not materially impact the ballot results. Thank you Irv for your comment which does not require any changes to the draft technical report or any further processing.))

The Yes vote from Gene Milligan had the following comment:

The D1226r6.doc file appears to be defective and/or not a Word 6 file. This vote is based upon the PDF and in the absence of a Word 6 file, the PDF will be forwarded.
